EDUCATION

University of Arkansas
Bachelor of Engineering, Industrial Engineering

Fayetteville, AR
May 2029
GPA 2.375

Trinity Christian Academy
High School Diploma. Honors Graduate.

Addison, TX
May 2025

EXPERIENCE

Shop Assistant

December 2023 – August 2025

ClubCorp

Frisco, TX

- Tracked stock levels and product movement, restocking merchandise to maintain consistent inventory accuracy.
- Coordinated event preparation and guest flow logistics to support smooth member engagement activities.
- Identified and relayed inventory needs and member concerns to management, supporting operational continuity.
- Assisted members with product inquiries and recommendations, maintaining high service standards.
- Maintained store cleanliness and visual presentation to uphold a professional environment.

Cook

May 2023 – December 2023

Shake Shack

Dallas, TX

- Organized cooking station to maximize throughput speed and reduce waste during service.
- Prepared menu items following company standards and food safety guidelines.
- Supported team operations during peak rushes and performed closing duties including restocking and safety checks.

PROJECTS

Dam Retrofitting Solutions: Arkansas Statewide Innovation Project

March 2026 – April 2026

- Designed engineering solutions for a statewide problem of retrofitting dams in Arkansas as part of an innovation project.
- Applied systems thinking to develop and present a viable approach to a large-scale infrastructure challenge able to be applied to 1200+ dams and reservoirs.

Water Filtration Project

October 2025 – November 2025

- Designed and developed a water filtration solution as part of a freshman engineering course project.

Assistive Device Design for Child with Peroxisomal Biogenesis Disorder

April 2025 – May 2025

- Designed an improved assistive solution for a child living with peroxisomal biogenesis disorder to address practical challenges faced by him and his family in daily life. with \$250 budget for materials in a 2 month timespan
- Applied engineering design principles to identify needs, develop a concept, and produce a solution tailored to a specific user's condition.

Leadership Experience

Boy Scouts of America

Eagle Scout

- Completed a leadership-driven community service project, led volunteer teams, mentored younger scouts, and developed long-term planning and logistics coordination skills through advanced scouting experiences.

SKILLS

Technical: Proficient with: Java, JavaScript, HTML/CSS, Bootstrap 4, Python

Academic Experience in: Python and R Code

Operations & Engineering: Inventory management and tracking, Process improvement and workflow optimization, Project planning and scheduling, Mathematical reasoning and problem-solving, Team collaboration and leadership
